Information Systems graduate with a strong foundation in programming, web development, and database management. Skilled in system troubleshooting and problem-solving, with a proactive, adaptable mindset and clear communication. Ready to contribute to fast-paced tech teams and deliver efficient solutions

EXPERIENCE

PEER CARGO MOVERS INC.

IT Intern / Web Developer

January 2025 – May 2025

- Developed a fully responsive company website using HTML, CSS, and Bootstrap, ensuring that it worked smoothly across different devices and screen sizes.
- The website was designed not only to represent the company's profile but also to help attract more customers by highlighting its services in a clear and professional way.
- I collaborated with staff to gather requirements, analyze their needs, and implement user-friendly features that aligned with the company's goals.
- I also handled system troubleshooting, deployment, and provided ongoing technical support to ensure the website remained stable and functional after launch.

FACULTY EVALUATION SYSTEM

Capstone Project – Kolehiyo ng Lungsod ng Dasmariñas

August 2024 – December 2024

- Designed and developed a web-based Faculty Evaluation System using PHP, MySQL, and Bootstrap to streamline the evaluation process of teachers.
- I implemented a secure login authentication system to ensure that only authorized users such as students, faculty, and administrators could access the platform.
- The system included dynamic evaluation forms, which allowed students to submit evaluations easily, and automated the computation of scores, eliminating manual errors and saving time.
- On the admin side, I developed features where administrators could view the total scores and detailed evaluation results, along with visual representations such as charts and graphs to help them better analyze teacher performance.
- The project helped improve efficiency by reducing paperwork, automating report generation, and ensuring faster access to evaluation data for decision-making.

EDUCATION

KOLEHIYO NG LUNGSOD NG DASMARIÑAS

Bachelor of Science in Information System

TECHNICAL SKILLS

- Programming: C++, PHP
- Web: HTML, CSS, Bootstrap, Javascript
- Database: SQL, MySQL
- Tools: Visual Studio Code, XAMPP,

SOFT SKILLS

- Communication
- Problem Solving
- Adaptability
- Time Management
